WAIT TIME MANAGEMENT

https://youtu.be/5sodrfYVRHg

A mobile system whereby patients and families can see what is occurring in anticipation and during procedures.

Further Research

Broader Problem Space

- Wait lists used as an instrument to ration health care
- Health care providers work to preserve health care rationing, without jeopardizing the benefit
 of the procedure or causing undue stress and anxiety on the patient

Goals of Current Efforts

• In addition to reducing patient anxiety, existing studies attempt to address increasing patient times with capacity planning and patient flow modeling to identify bottlenecks

Role of Wait Time Management Project

- Our project provides a first step towards this ultimate solution by capturing data points to develop a framework for operational modeling
- The proposed solution allows the client health care provider understand the steady-state throughput of their system

Blake, John; VanBerkel, Peter. A comprehensive simulation for wait time reduction and capacity planning applied in general surgery. Retrieved from https://link.springer.com/article/10.1007/s10729-007-9035-6

Team & Roles

TRACY HU Project Manager

Epic EHR, Population Health, SQL, Python

ALAIN BROWN Developer

Java, C++, Python, Cloud Services

JAMES FRY Developer

Javascript, Node.js, Python, PHP, SQL, React, JQuery

RAJAN CHAUDHARI *Developer*

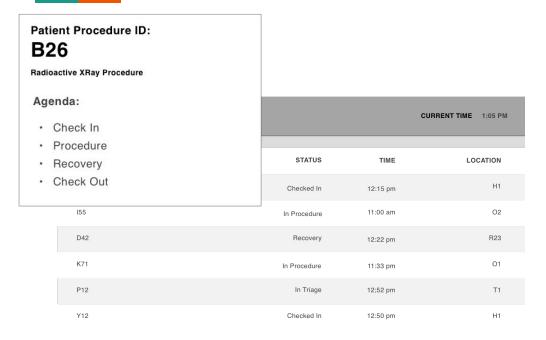

Python, SQL/Hive/Pig, Data Science/Stat/ML

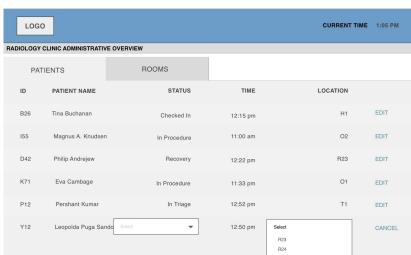

HEIDI BRAUNSTEIN Developer / QA

HCI, Java,
Python, Frontend
- Angular,
Backend - Java,
SQL, Data
Science, ML

Application Overview

Architecture Diagram

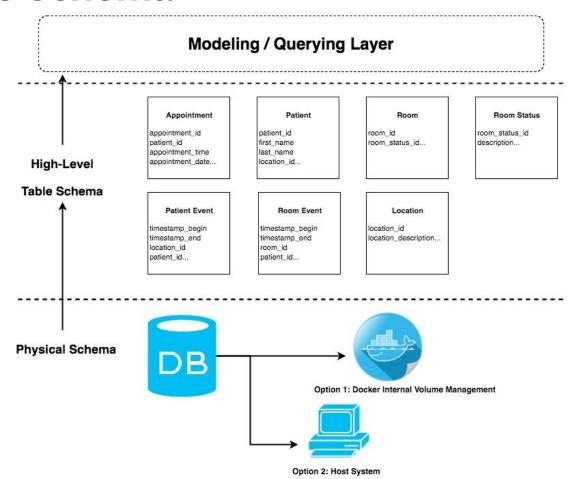

Languages: Java, Javascript

Tools: Docker, Jetty, Eclipse, MySQL

Integrations: Cerner, Airflow

Database Schema

Concerns

- Mentor Availability
 - We have been able to gather their cell phone contact information and have weekly standing meetings
- Cerner and Airflow integration
 - Tool will be built to be service oriented to be flexible with different data sources

Plan of Action
